

iPot mini

Just one bong.
Five cool colors.

Everything you love about pot just got more mellow. iPot mini — available in Mac and Windows for just \$499 — lets you bring along enough smoke for a three-day weekend getaway in a package so small you'll forget you're carrying it. Until the police ask you about it.

Pod mini Features

- Keep up to 1,000 minutes of intoxication in your pocket
- Use iPot mini with Mac OS X or Windows 2000/XP
- Take it everywhere — it's legal in the Netherlands and England
- Get stoned fast with the built-in Apple Recirculation Fan
- Enjoy up to 8 hours flying high
- Play MP3, AAC and Apple Lossless music when you light up
- Smoke without fear — 25 minutes of aroma-cancelling protection
- Enjoy seamless integration with iTunes and Mac OS X or Windows
- Sync iPot with iTunes, iCal, and iChat via included FireWire or USB 2.0 cables
- Use as a portable whiskey still — make your moonshine with the distillery accessory
- Remind yourself when you should sober up with iCal's scheduler link
- Automate your stoner contacts/calendars/not-to-do lists
- Choose from hundreds of cool accessories designed just for iPot mini

Fashionably Compact

Apple engineers squeezed all the best features of iPot into a case weighing just 3.6 ounces and smaller than most cell phones. iPot mini features an iridescent glass pipe that resists stains and scratches. The case weighs practically nothing, but protects iPot mini in your pocket, purse or backpack. iPot mini's effect lasts up to 8 hours on a single toke. With the Firewire or USB link, the iPot automatically starts your iPod's iTunes playing and locks you out of your computer after saving

all open files. Access to your Mac can be restored only four hours after the iPot's temperature sensor drops below 50°C.

Now It's safer to Be StONed

In fact, all the features of iPot are still under your thumb. Always striving for perfection, Apple engineers moved the iPot's crucible away from the mouthpiece. The iPot mini gives you the enhanced sensation of a high-tech high with the iTunes and file protection features enabled by the USB or Firewire port. The built-in smoke detector and temperature sensor links to all the songs from your iTunes music collection while protecting your Mac from random entries. You'll find such thoughtful features only from Apple. Because, try as they might, the competition can't even believe this.

Oh, one other minor detail, you can choose your iPot mini in one of five trend-setting colors: silver, gold, green, pink or blue, all shiny.
